DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3, "a lever-like manner" is indefinite (see line 4).

Election/Restrictions

3. Claims 5-14 and 16-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species I, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/21/07.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Franz Xavier (foreign pat. No. 479 802).

Art Unit: 3724

- Claims 2 and 3; a transmission arrangement/lever element (*b* and *d*) and a measuring sensor *i*.
- Claim 15; the weighing element is foldable out of the body about at least one of the spindles (see The arc-arrow in the fig.).

Allowable Subject Matter

6. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ackeret et al. and Oldendorf et al. are cited to show a related device.
